

CALIFORNIA DEPARTMENT OF
FOOD & AGRICULTURE
A. G. Kawamura, Secretary

Dairy Technical Coordination Committee

DRAFT VISION & MISSION

VISION

“The DTCC will produce a multi-media dairy research plan for both air and water quality that contains validated science in response to present and anticipated dairy needs focusing efforts to enable a long-term economically sustainable dairying industry while achieving environmental performance goals.”

DTCC Mission

- Identify innovation technology and respond to emerging issues;
- Identify air & water quality research opportunities for California dairies;
- Provide direction for siting demonstration projects on-farm;
- Ensure management actions/practices are validated, cost effective, and meaningful;
- Assist with consumer satisfaction of dairy environmental performance;
- Provide opportunities to increase dairy and consumer education & outreach;
- Identify and leverage funding through cooperative agreements.

Goal

“Reduce nutrients and salts that affect the quality of the states’ water.”

Goal

“Reduce particulate matter and volatile organic compounds that affect the quality of the state’s air.”
